

MAKE A MAGIC WAND!

**Looking for a fun project to keep the kids occupied?
They'll love designing and making their own magic wand!**

1. Find the perfect magic stick - anything from a long twig to a short bamboo cane will do. (just make sure it's not too sharp and pointy!) Have a hunt in the garden!

2. Using paints, create a unique design - spots, stripes, splodges, get creative!

3. once the paint has dried, you can add detail with pens, use some sparkly stickers, or even add some glitter!

4. Take some wool, cord or embroidery floss, and wind it round the stick to add some texture - you can thread beads on as you go to give it some extra magic!

5. You're done! Start practicing your spells or stirring your potion - don't forget to write them down for future magic moments!
